FERTIUM K

ORGANIC POTASSIUM SOLUTION

Fertium K is a **concentrated potassium solution**, specially **designed to optimize the quality of the crops**, in addition to improving the resistance of plants to attacks by pests and diseases.

Contains TCA (Tricarboxylic Acids) which improves the soil fertility by increasing the nutrient exchange points and conditions the chemical and biological properties in the application zone.

Fertium K provides a rapid supply of potassium in the fruit filling phases, improving quality before ripening, significantly improving the basic components of plant performance, such as fruit size, color, sugar content and starch and favors aspects such as resistance to adverse weather conditions (dry, cold, etc.).

Fertium K

23% (30.0%)

Recommended doses

Foliar application

Vegetables	3-5 L/Ha
Fruit trees	4-6 L/Ha
Vineyard	3-5 L/Ha
Citrus	3-4 L/Ha
Cereals	2-3 L/Ha

Packaging

1L, 5L, 20L
