FERTIUM KOHAT

HUMIC ACID COATING TO PROTECT AND HOMOGENIZE BLENDS

Coating for granular fertilizers, very easy to handle and store, which provides an anti-dust and anti-caking effect.

Formulated with humic acids that protect nutrients from being blocked in the soil and with black colour which brings to the final mixture a more homogeneous appearance.

Easy to use, with a **low application rate** of 0.4 - 0.3 kg per ton of the mixture and available in **two presentations**; dispersible granules and oil-based liquid solution.

With Fertium Kohatit is brought to the final products an **anti-dust and anti-caking effect** and a homogeneous appearance.

	Total humic extract	Fulvic acids	Humic acids	K ₂ O	pH
Fertium Kohat	40%	35%	5%	15%	10
Fertium RenoKohat	22,5% (w/v)	13,5% (w/v)	9% (w/v)	3% (w/v)	-

Recommendation for use

Dillute Kohat (powder) in water at concentration of 10% (for example, 5 Kg of Kohat in 50L of water).

Spray 3-5 L of the Kohat solution to 1 ton of the final blend.

Packaging

5Kg (Kohat)

20L, 1000L RenoKohat
