FERTIUM N-SHOOT / FERTIUM N-SHOOT AMINO

ROOT AND RHIZOSPHERE ACTIVATOR

Fertium N-shoot range improves the chemical state of the soil, conditioning it to unlock nutrients, thus improving the nutrition of subsequent crops. **Its acidifying action mobilizes the blocked elements**, helping plant roots to improve their chemical environment, which is essential for proper nutrition in some soils.

Formulated with DURAMON® technology, it reduces and controls nitrogen losses, while allowing its gradual release and enhancing its effectiveness.

N-shoot also restores and reactivates the root tissue, leaving it in the best conditions for its subsequent development, while unblocking the nutrients from the soil, even from previous applications, making them available for plant absorption.

	Free amino acids	N	SO ₃	Fe	Mn	Zn
Fertium N-Shoot	-	6% (7,2%)	18% (21,6%)	3% (3,6%)	0,15% (0,18%)	0,01% (0,02%)
Fertium N-Shoot Amino	6% (7,5%)	6% (7,5%)	14% (17,5%)	3% (3,7%)	0,15% (0,18%)	0,01% (0,02%)

Recommended doses	Foliar application
Fruit trees	20-25 L/Ha
Vegetables	7-12 L/Ha
Vineyard	12-14 L/Ha
Citrus	20-25 L/Ha

Packaging

1L, 5L, 20L
