FERTIUM PHOSPHOACTIVE

PHOSPHATE FERTILIZER WITH SLOW RELEASE ACTION IN ACIDIC SOILS

Phosphoactive is a granular fertilizer rich in **specific phosphorus for acidic soils**.

Contains specific macro- and micronutrients that adds nutritional value and efficiency, by comparison to other phosphate sources such as DAP, TSP and MAP.

Each granule **contains monocalcium, dicalcium and tricalcium phosphate**. Monocalcium phosphate; soluble in water and quickly absorbed by the roots. Dicalcium phosphate; for a medium-term use and tricalcium phosphate; ensuring the availability of phosphorus in the latter stages of the crop.

It can be blended, it does not react with urea or other raw materials during mixing, storage or application.

	N	P ₂ O ₅	CaO	MgO	SO ₃	Zn
Phosphoactive 2510	0%	25 %	20%	3%	10%	0,1%
Phosphoactive 3520	0%	35 %	20%	0%	5%	0,1%
Phosphoactive 10-25	10%	25 %	20%	2%	6%	0,1%

Recommended doses

Cereals	200-400 Kg/Ha
Vegetables	400-800 Kg/Ha
Soybean	250-400 Kg/Ha
Potato	400-500 Kg/Ha
Maize	400-600 Kg/Ha

Packaging

25Kg, 50Kg, 600Kg
